BHUSHAN L. PARADKAR

Angular Developer | Frontend Developer | 4+ Years Experience Building Enterprise SPA Applications

Mumbai, India | +91 9130595403 | bhushan.paradkar1993@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Angular Developer with 4+ years of experience designing and delivering scalable, high-performance Single Page Applications (SPAs) using Angular (v10–v18), TypeScript, and RxJS for BFSI/insurance enterprise platforms. Proven track record of building reusable component libraries, optimizing application load performance, and integrating RESTful APIs across multi-module workflow systems. Hands-on expertise in Reactive Forms, Lazy Loading, Route Guards, Dependency Injection, Standalone Components, and Angular Signals. Experienced in Agile/Scrum delivery, mentoring junior developers, and leveraging Generative AI tools (GitHub Copilot, Claude) to accelerate development velocity.

CORE TECHNICAL SKILLS

Frameworks	Angular (v10–v18), TypeScript, JavaScript (ES6+)
UI / Styling	HTML5, CSS3, SCSS, Bootstrap, Angular Material
Reactive Programming	RxJS, Observables, Subjects, BehaviorSubject, Reactive Forms
Architecture	Component-Based SPA, Lazy Loading, Dependency Injection, Route Guards, HTTP Interceptors, Standalone Components, Angular Signals, OOP & Design Patterns
State Management	RxJS-based State Management, Service-Layer Patterns
Database	Oracle SQL
Testing	Unit Testing (Jasmine/Karma)
Tools & DevOps	Git, Angular CLI, VS Code, Chrome DevTools, Azure DevOps, Agile/Scrum, CI/CD
Integration	RESTful APIs, Cross-Browser Compatibility, Performance Optimization, Error Handling
AI Tools	GitHub Copilot, Claude (Generative AI for development productivity)

PROFESSIONAL EXPERIENCE

Consultant – Angular Developer | Mindcraft Software Pvt. Ltd. *Mar 2023 – Jul 2026*

- Developed and maintained enterprise-level Angular (v10+) modules for a BFSI insurance platform, improving application scalability and reducing repeat production defects.
- Built a library of reusable, modular UI components using component-based architecture and OOP principles, cutting new-feature development time by an estimated 20–25%.
- Leveraged RxJS Observables, Subjects, and BehaviorSubjects to manage asynchronous data streams and reactive state across multi-stage workflow screens.
- Integrated 10+ RESTful APIs for dynamic data rendering and backend communication, supporting real-time status updates across policy-processing workflows reducing client-side data latency by 15%.
- Optimized application performance and load times through lazy loading and change-detection tuning, improving perceived page-load speed for end users .
- Partnered with backend, QA, and product teams in an Agile/Scrum environment, participating in sprint planning and delivering features on a two-week release cadence.
- Adopted Generative AI tools (GitHub Copilot, Claude) into the daily workflow for code scaffolding, debugging, and code review, increasing individual development throughput.
- Recognized with three Mindcraft Service/Performance Awards (2024, OND 2025, 2026) for consistent delivery quality.

Angular Developer | Wesually Design Studio *Jul 2022 – Mar 2023*

- Developed Single Page Applications (SPAs) using Angular, improving user experience and interface responsiveness for client-facing products.
- Designed and implemented HTTP services for REST API communication, standardizing data-fetching patterns across the application.

- Built a set of reusable UI components adopted across multiple modules, reducing duplicate code and development time.
- Implemented reactive form validations and structured user-input handling to reduce invalid form submission exceptions by 30%.
- Managed source code using Git version control with a structured branching strategy to support parallel feature development.
- Maintained high code quality across Angular applications by writing precise, modular unit tests utilizing Jasmine's describe(), it(), and expect() blocks alongside Karma to validate complex business logic and UI states.

KEY PROJECTS

Kotak Life Insurance – EPIC Portal | *Insurance / BFSI* | *Mindcraft Software Pvt. Ltd.*

- Engineered an end-to-end policy processing system automating the full insurance workflow from document submission through policy issuance.
- Built modules for document verification, medical underwriting, and policy issuance using dynamic, rule-driven UI flows.
- Implemented multi-stage processing with conditional routing, state-driven UI transitions, and real-time status updates via RxJS, supporting concurrent processing of high policy volumes.
- Mentored 2+ junior developers on Angular best practices, code standards, and reactive programming patterns, improving team code-review turnaround.
- Managed Git version control and branching strategy, maintaining a clean commit history and structured PR review process.
- Drove adoption of Generative AI tools for scaffolding, debugging, and code review, improving team-wide development productivity.

Kotak Life Insurance – ERF (Edit Rights, Refund, Financial) Portal | *Insurance / BFSI*

- Built the Edit Rights module enabling controlled modification of live policy data within the EPIC ecosystem.
- Developed the Financial module supporting document upload plus a maker–checker approval workflow for financial documents.
- Implemented the Refund module handling policy refund and reopening flows for policies not taken up by clients.

EDUCATION

- B.E. (Engineering) — Rashtrasant Tukdoji Maharaj Nagpur University 2011–2014 (66.90%)

ACHIEVEMENTS

- Service Award – 2026, Mindcraft Software Pvt. Ltd.
- Quarterly Performance & Service Award – OND 2025, Mindcraft Software Pvt. Ltd.
- Service Award – 2024, Mindcraft Software Pvt. Ltd.
